Gokul Sureshkumar

Software Engineer | Python · AI

Coimbatore, Tamil Nadu, India | +91 8838873066 | gokulsureshkumar450@gmail.com | linkedin.com/in/gokul-suresh-4731121a1

Professional Summary

Software Engineer with 3+ years of experience designing, developing, testing, deploying, maintaining, and enhancing production software in Python, JavaScript, and PHP. Builds distributed data-synchronization systems that process 1M+ orders per day for 300+ sellers on a multi-tenant SaaS platform, and triages, debugs, and resolves production issues end to end, with 100+ incidents resolved. Reviews code for style, accuracy, testability, and efficiency, writes technical documentation and user guides, and applies AI (LLMs, Model Context Protocol) to development and debugging workflows. Versatile across backend, search, data, accessibility, and AI work, managing project priorities, deadlines, and deliverables with minimal supervision.

Technical Skills

- **Languages:** Python, JavaScript, PHP, SQL, HTML5, CSS3, Web Accessibility (Semantic HTML, ARIA, Keyboard Navigation, Screen Readers)
- **Frameworks:** FastAPI, Django, Pydantic, Laravel
- **Systems:** Distributed Systems, Large-Scale System Design, Microservices, Event-Driven Architecture, RESTful APIs, Multi-Tenant SaaS, Search & Information Retrieval (Full-Text Search, Filtering)
- **Data Storage:** PostgreSQL, MySQL, Elasticsearch / OpenSearch, Indexing, Query Optimization, Database Performance Tuning
- **Cloud & Tools:** AWS, AWS SQS, Docker, CI/CD, Git
- **Artificial Intelligence:** LLMs, Prompt Engineering, Model Context Protocol (MCP), Claude AI, Cursor AI, GitHub Copilot, AI Coding Agents
- **Quality & Operations:** Code Review, Technical Documentation (OpenAPI / Postman API Docs, User Guides, Runbooks), Unit Testing (PHPUnit, Pest), Debugging, Issue Triage, Root Cause Analysis, AWS CloudWatch, Bugsnag, Rollbar, PostHog
- **Security:** Secure Coding, Tenant Data Isolation, OAuth & API Token Handling

- **Core CS:** Data Structures, Algorithms, Object-Oriented Programming, Design Patterns
- **Data:** pandas, NumPy

Professional Experience

Software Developer (Backend) | Mallow Technologies Private Limited, Coimbatore, India | 07/2024 – Present

- Wrote and maintained product code for a multi-tenant SaaS analytics platform serving 300+ overseas Amazon and Walmart sellers, using Python (FastAPI), PHP (Laravel), PostgreSQL, and MySQL on AWS.
- Designed distributed integrations with Amazon SP-API and Walmart Marketplace API that synchronize 1M+ orders per day of inventory, order, fulfillment, and financial data, using event-driven, asynchronous processing with AWS SQS.
- Triaged, debugged, tracked, and resolved 100+ production issues by analyzing their sources and their impact on service operations and data quality, using AWS CloudWatch, Bugsnag, Rollbar, PostHog, application logs, and API traces.
- Reviewed teammates' code and gave feedback on style guidelines, accuracy, testability, and efficiency; wrote unit tests with PHPUnit and Pest.
- Built full-text search and filtering features with Elasticsearch / OpenSearch, and improved service efficiency by indexing large tables, tuning SQL queries, optimizing the database, and refactoring code.
- Owned features through design, development, testing, deployment, maintenance, and enhancement, writing HLD/LLD design documents and managing priorities, deadlines, and deliverables with minimal supervision.
- Built Model Context Protocol (MCP) servers and tools that speed up production debugging, and led proof-of-concept work on LLM-powered features; use AI coding assistants (Claude AI, Cursor AI, GitHub Copilot) and AI coding agents for development, code review, and test generation.
- Implemented Stripe payment integration covering subscriptions, webhooks, event processing, and billing workflows.
- Wrote and maintained API documentation (OpenAPI, Postman), user guides, and internal runbooks, updating them after each release and revising them from client and support feedback; mentored 5 junior engineers, ran knowledge-sharing sessions, and conducted technical interviews.

- Collaborated across time zones with overseas clients, product owners, designers, and QA in Agile/Scrum.

Junior Software Developer | Mallow Technologies Private Limited, Karur, India | 07/2023 – 06/2024

- Developed and maintained web applications using PHP (Laravel), JavaScript, HTML5, and CSS3, building accessible interfaces with semantic HTML, ARIA attributes, keyboard navigation, and screen reader fixes, including accessible reports and exports.
- Contributed to RESTful API development, feature implementation, and bug fixing, improving application stability and performance.
- Reviewed code following secure coding and software development best practices.
- Wrote technical documentation and user guides for internal teams, and provided production and customer technical support.

Projects

Kwickmetrics – Inventory & Sales Analytics Service | Python, Django, Laravel, pandas, NumPy, PostgreSQL

- Built a Laravel / Python app server with REST APIs to ingest inventory and sales data and serve analytics endpoints.
- Used pandas DataFrames and NumPy to clean, aggregate, and analyze records, producing reports.

Appointments Tracker (Personal Project) | Python, FastAPI, Pydantic, REST APIs

- Designed a FastAPI backend to create, schedule, update, and cancel appointments, using object-oriented design and Pydantic models for request validation and auto-generated OpenAPI documentation.

Education

Bachelor of Science, Mechatronics Engineering | Kongu Engineering College, Erode, India | 06/2023 | CGPA: 8.38 / 10

Languages

English, Tamil
